Comment. As compared with the last reported status of 21 Decem- 25X1A
ber 1952, coal stocks increased by 18,042 tons to a total of 170,322 tons.
However, hard coal stocks continued to decrease by 7,300 tons. According
to the present daily coal consumption quota of 23,520 tons, coal stocks
available were adequate for 7.2 days' requirements.
The backlog of undispached cars was extremely high and showed the opera-
tional difficulties of the East German railroad during December. The number
of damaged cars increased slightly. For 24 through 29 December, the daily
operations reports do not furnish data on the park of damaged cars. Pro-
bably, no counts were made during the Christmas holidays. The number of
operational cars continued to exceed the prescribed quota of 100,000 units.
